

A Understanding the text

A1 Read the speech transcript and complete the chart below with the main idea of each paragraph.

A2 Read the speech transcript again carefully and answer the following questions.

1 When was the first meeting of the UN held?

2 What do various water projects aim to do?

3 What is the UN's number one Sustainable Development Goal?

4 Under what circumstances is learning often difficult for children?

A3 In pairs, discuss the following questions.

1 Why does the speaker describe the background to the establishment of the UN in detail? What effect does it have on the audience?

2 At the end of the speech, Howard Zinn is quoted as saying, "Small acts, when multiplied by millions of people, can transform the world." How do you understand this quote?

3 What efforts has the UN made to tackle other global issues?

In conflict zones across the world, a group of brave men and women wearing blue helmets risk their own lives to defend people who are unable to defend themselves. They are the UN peacekeepers, who (1) _____ helping countries torn by conflict create the conditions for lasting peace. The UN peacekeeping is a collective (2) _____ in global peace, security and stability. As a result of the peacekeeping missions, international peace and security (3) _____.

So, how does a peacekeeping mission come about? First, the UN holds a number of consultations to determine the best response by the international community. Then the UN Security Council determines whether any crisis is likely to pose a threat to peace and (4) _____ methods of adjustment or terms of settlement. If the Security Council thinks that establishing a peacekeeping operation is the most proper step to take, it will adopt a resolution, and with the permission of the main parties to the conflict, the UN peacekeepers will be deployed to address local conflicts and (5) _____ the safety of civilians.

The UN does not have a standing army, but it has about 90,000 peacekeepers. These peacekeepers are drawn from the UN Member States, and are (6) _____ actively deployed in a number of peacekeeping operations around the world. China, one of the five permanent members of the Security Council, plays a (7) _____ role in the UN peacekeeping operations. Since 1990, China has sent more than 50,000 peacekeepers to participate in the UN peacekeeping missions. These brave peacekeepers, whose service and sacrifice (8) _____ to the lives of others, clearly deserve our respect.

B2 The speech transcript uses emotive language to give detailed background information on why the United Nations was established. Find the description in the transcript and write a short introduction to the launch of China's Project Hope in a similar way.

Learn this Emotive language makes the reader feel a variety of human emotions such as joy, fear, anger and sadness. It makes your writing lifelike and thought-provoking. Pay attention to the following words:

Giving a man a fish

(1) Across the globe, millions of people are displaced by disasters. (2) They are often left homeless and have only limited access to basic necessities. (3) Such was the situation for the people of Mosul, the second largest city in Iraq. (4) In 2016, many Mosul citizens were threatened by war and fled the city. (5) On their way to refugee camps, shadows of famine and disease hung over them. (6) Fortunately, they received food assistance from the World Food Programme (WFP).

(7) As these people made their dangerous journey, WFP set up a network of emergency camps, located as close to the front line as safety would allow. (8) At these camps, the refugees were given boxes with ready-to-eat food, such as canned meat, dried fruit and biscuits. (9) Each box was enough to feed a family of five for three days. (10) Once they were settled there and had access to cooking facilities, WFP provided them with food supplies including wheat flour, rice, chickpeas, sugar, salt and oil, which could feed a family of five for one month.

(11) In times of emergency, when people's lives are threatened, such timely assistance can make the difference between life and death. (12) Indeed, for refugees in search of a new life, WFP's short-term intervention helps make this small step of their dangerous journey ahead a little bit easier. (13) Thus, it gives the age-old saying "Give a man a fish and you feed him for a day" a new meaning in the modern context.

B1 Below is a magazine article on the effort WFP has made to help people in need. Read the article and fill in the chart below.

Teaching a man to fish

Tens of thousands of Sahrawi people from Western Sahara live in extremely harsh conditions. As the desert’s arid climate makes it difficult to grow crops, goats serve as their main source of food. However, dried animal feed is often too expensive to buy, so most Sahrawi people have no choice but to feed their goats household rubbish, including plastic waste. It is then not surprising that the lack of nutritious animal feed affects the goats’ health. This also takes its toll on people, as the quality of goat milk and meat may be negatively impacted. Those who consume goat products can become very ill, and many of them suffer from malnutrition as a result. Thankfully, the World Food Programme has teamed up with local engineers to make the seemingly impossible possible: growing plants in the desert.

The technique behind this amazing achievement is hydroponics. Hydroponics uses up to 90% less water than traditional agriculture because the plants are grown without soil inside closed containers that run on solar power. Thanks to this special nutrient solution, the plants can grow twice as fast as those using traditional farming methods. The Sahrawi participants in the project receive training on how to use the hydroponics system. Consequently, not only is cheaper and better food provided for livestock, but any extra food can be sold in the market to generate additional income.

Innovative techniques such as hydroponics offer a long-term solution to the Sahrawi people, enabling them to remain self-reliant long after WFP has gone. What WFP has been doing clearly shows the wisdom of the old saying “Teach a man to fish and you feed him for a lifetime”.

B2 As the saying goes, “Give a man a fish and you feed him for a day. Teach a man to fish and you feed him for a lifetime.” Write an outline of a three-paragraph essay about how you understand the saying. Your essay should include the title, introduction, main body and conclusion.

B After the interview, Molly has found a website article about volunteering. Read the article below and fill in the following table.

Volunteering: everyone benefits

“Life’s most persistent and urgent question is, ‘What are you doing for others?’” asked Martin Luther King, Jr., a great advocate for social justice. In asking this question, King called on us to reflect upon our responsibility for society, and consequently put great effort into the worthy cause of serving our fellow human beings.

For most people, there are the traditional types of volunteering that are done within one’s community, such as volunteering at children’s homes or collecting data about the local animal and plant life to assist with conservation efforts. However, volunteering is not just limited to local opportunities. With virtual volunteering, which takes advantage of the Internet, we can serve others in the comfort of our own homes. For example, volunteers can translate documents into different languages or help students with their schoolwork online. There is also an unusual type of volunteering called voluntourism, a combination of volunteering and tourism, which allows us to serve people in need when we travel to other regions or countries.

With all these different ways to serve others, a common question arises: what benefits can volunteering provide us with? Firstly, volunteering makes us feel an emotional connection to the community. We are willing to devote our time and effort unconditionally to helping build a better community. Secondly, volunteering is good for our physical and mental health. Our stress levels are reduced when we do meaningful volunteer work, which further enables us to sleep better or get sick less often. We also gain a sense of purpose in life and become happier. Thirdly, volunteering offers us an amazing opportunity to learn valuable skills. We meet new people, expand our relationship network and improve our social skills. We are always placed in situations that require us to learn new skills and challenge ourselves by stepping outside our comfort zone.

No matter whether you volunteer at a non-profit organization or in the community, all of the volunteer work makes you a better person, improves other people’s quality of life and has a huge impact on the world. This is ultimately why we serve.

Read the short story about the life-changing power of a stranger's kindness.

The chain of kindness

The rain was coming down so hard that each drop seemed to explode as it hit the roof of the car. Tom strained his eyes and looked out into the coal-black night, struggling desperately to keep his car on the road. The windscreen wipers worked furiously to clear the glass, but they were not doing much good. The rain beat down continuously, it was
5 completely dark outside, and the road was deserted except for him and his car.

Tom glanced in his rear-view mirror. He could see his wheelchair in the back seat and quickly looked down at his thin, broken legs. He could feel a familiar wave of despair start to wash over him. The rain was still pounding on the roof of the car and he felt as if he had been trapped inside a drum. As the world outside began to close in on him, Tom
10 gasped for breath. Suddenly, a loud noise shook Tom out of his moment of hopelessness as the car began to bump down the road. "Great," he thought, "a flat tyre."

With a heavy sigh, Tom brought the car to a stop, resting his head on the steering wheel, defeated! After a few seconds, he looked up and peered out of the window. The rain seemed to have eased a little, and in the distance, he could see a light twinkling in the
15 blackness. With a sense of hopeful anticipation, Tom gently eased the car towards the light. As he got closer, he could see a long driveway leading to a solitary house.

When Tom approached the house, a young girl around ten years old was standing in the doorway. He pulled up as close as he could and rolled down the window. "Are your parents at home?" he shouted over the wind and rain. "I have a flat tyre and I need
20 help," Tom added.

"Wait a minute," the girl replied. She turned and went into the house. A few minutes later, she returned with an old man. The girl held his arm and smiled lovingly up at him.

"How can I help?" the old man asked with a smile on his face.

Tom explained the problem and added, "I need help because my legs are paralysed."
25 The words came out flat. But he did not know how else he could convey the fact that he

needed help from this weak old man in the middle of the rainstorm. The old man simply nodded his head and asked Tom to open the boot of his car. With the help of his young assistant, the old man quickly got to work. Occasionally, Tom leaned out of the window to see how they were doing with the repairs. The two were concentrating on their work,
30 and the rain was soaking them. Once again, Tom couldn't help but feel he was useless.

Soon the old man stepped to the window. "You're all set," he said. Tom had money ready and handed it to the old man, but he made no move to take it.

Finally, the young girl said, "Grandfather is blind."

Tom did not know what to say. He just gestured towards the girl and the old man
35 helplessly as he stumbled through an explanation that he would like to pay them for their help.

The grandfather waved a hand in front of his face and said, "There is no need. Just be careful about getting home and continue the chain of kindness."

Tom eased his car down the driveway and back onto the road. The rain was now only
40 a light mist, revealing the road ahead. As he drove through the night, he found himself looking forward to the journey ahead.

When Tom eventually arrived home, he parked his car in front of the house as usual. He looked at the wheelchair ramp that led to his front door. Before today, that ramp had been a constant reminder of his own disability, and every day, he could feel it laughing
45 at him. However, a chance encounter on a rainy night and an act of kindness from a complete stranger came to make Tom see everything differently.

Over the next few days, he kept replaying the incident over and over in his mind. Inspired by this, he contacted his doctor to see if there was something he could do to increase his mobility, he pursued his long-lost dream of becoming a teacher, and he
50 reconnected with his family. Perhaps Tom was disabled in one way, but he decided that he would not let this define who he was or what he could accomplish. Most importantly, he began to look forward to each new day and view it as an opportunity to help others so that he could continue the chain of kindness.

A *Retell the short story in your own words.*

B *How might Tom continue the chain of kindness? Write a short paragraph about what Tom might do later.*

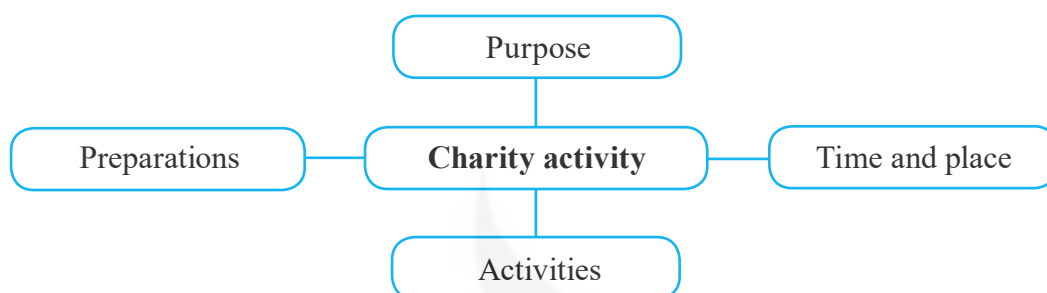

C *Have you been inspired by the kindness of others or helped someone in need? Describe the situation.*

Helping senior citizens embrace modern technology

Smartphones are an amazing example of modern technology and are rapidly becoming an essential tool for navigating our way through the modern world. However, not everybody is confident about using such electronic devices. This activity is designed to help senior citizens better understand how to use smartphones safely and effectively.

Time: 14:00–17:00, 16 October

Place: Local community centre

Activities:

- Showing senior citizens how to use smartphones to:
 - shop online and make online payments
 - make appointments with doctors
 - communicate with others on social media
- Answering the questions they have about using smartphones
- Explaining how to guard against the potential dangers of going online with smartphones

Preparations:

- Finding volunteers (including event organizers and photographers)
- Creating posters to advertise the event

UNIT 4

Law and order

The law is the scales of a nation, and the yardstick of a society.

—Wu Jing

In this unit, you are going to:

- read a lecture transcript about law;
- write an article about intellectual property;
- read an excerpt from a short story about a detective solving a crime;
- make a leaflet about a legal case.

Welcome to the unit

The law plays a vital role in our society. Read the encyclopaedia entry below and discuss the following questions in pairs.

Law

■ Definition

Law is a body of enforceable rules that govern a society.

■ Main functions

➤ Social control

The law can define the behaviour which is subject to legal punishment and outline the institutions and procedures of punishment if individuals break these rules.

➤ Dispute resolution

In a diverse society, minor disputes involving small-scale disagreements and major disputes involving fundamental disagreements can be resolved through legal intervention.

➤ Social change

The law can bring about far-reaching changes like creating rights for citizens, or everyday changes like banning the use of mobile phones while driving.

- 1 What do you think is the most important function of the law? Why?
- 2 What other information would you like to include in the encyclopaedia entry?

Reading

Without the law, human societies might not have developed in the way they have. The lecture below was given to high school students by a law professor. Before you read the transcript, think about the following questions:

- How do you think the law originated?
- What famous legal cases have you heard of?

Have you ever wondered when and where the law originated? Around 12,000 years ago in the Middle East, small permanent farming communities were established, changing traditional nomadic hunter-gatherer lifestyles. Different groups were closely living together and dealing with unfamiliar behaviours, beliefs and attitudes. To prevent chaos and resolve conflicts, the rules of conduct and consequences for unacceptable behaviours were created. Hence, the concept of law was born.

Many ancient civilizations arose in the Middle East, so it is not surprising that law codes first appeared there. The oldest discovered, the *Code of Ur-Nammu*, dates back to about 4,000 years ago. The code presented laws in the cause-and-effect format, a style used in nearly all later codes. Another one discovered, the *Code of Hammurabi*, was composed around 300 years later, which is one of the longest, best-organized and best-preserved legal texts. This code was among the first to implement the concept “innocent until proven guilty”. Both codes have features in common. For instance, they treated a variety of matters, but often ignored some important rules, because such rules were deeply grounded in custom.

Over time, laws evolve to become more sophisticated and wide-ranging. Societies constantly transform, so legal systems respond accordingly and ensure laws remain relevant. This response happens in various ways. Outdated laws are abolished when they no longer correspond with the values or moral beliefs of the current society. The most famous example is the abolition of slavery laws in certain countries during the 19th century. Current laws are amended when aspects of a crime change, such as becoming more serious or producing additional crime-related behaviour. In Australia, a law

amendment makes workplace bullying amount to a criminal offence. Besides, new laws are made as new situations develop such as those created by advances in technology or changes in societal attitudes. For instance, the advent of the Internet and social media has led to easier exchanges of information, and in turn has provided unauthorized access to personal data, so it is necessary to adopt a data protection law to strengthen the protection of online users' private information.

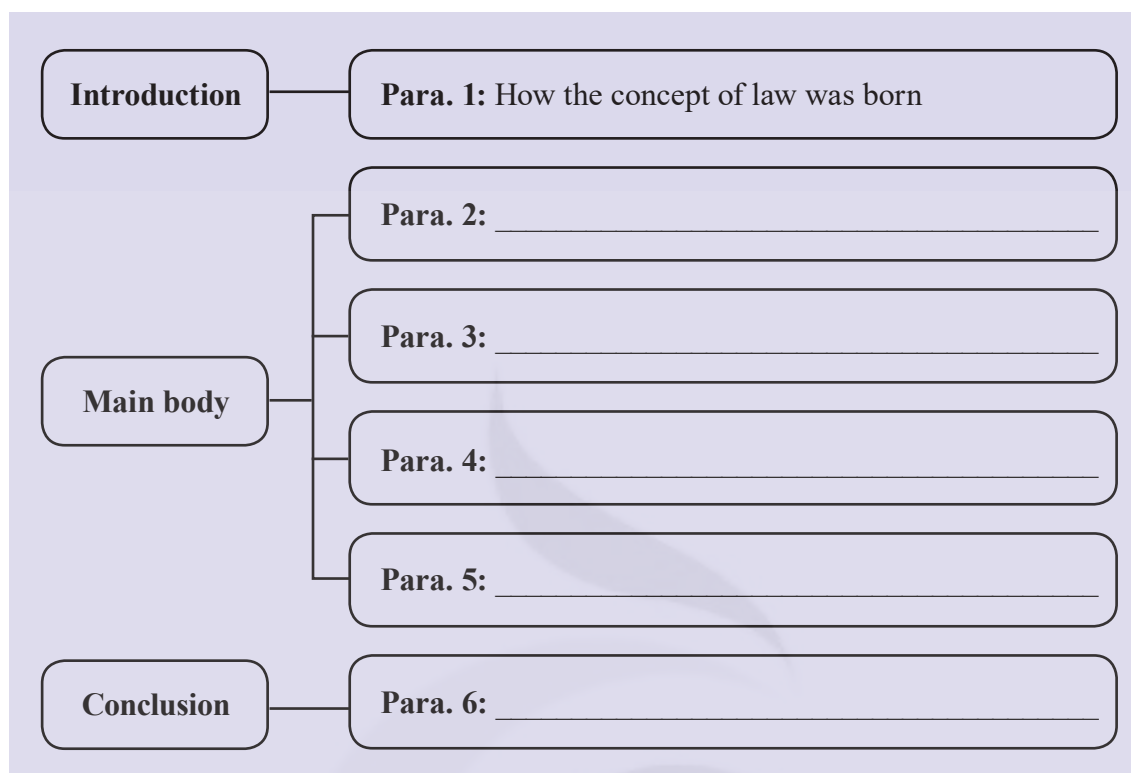

Evolving laws may represent a progressive society, but legal systems tend to remain relatively stable. Notably, global legal systems fall into categories that share similarities, and two main categories are civil law and common law. In the civil law system, laws are created by the country's legislature. Many European countries adopt this legal system. In the common law system, some laws are created by the legislature, but most are based on published court decisions from previous court cases, which are then implemented in future similar situations. The United States, the United Kingdom and Australia are examples of the common law system.

The law plays an essential part in resolving conflicts, settling disputes and making rules that everyone must follow, yet it has limitations. As the law is not applicable to all situations, it is just one instrument to regulate society. Governments usually employ other methods of social control to help society operate in a smooth and integrated fashion. Moreover, the law is not always ready or able to adapt to the constant changes in the society it serves. Because of its relative stability, it is unreasonable for the law to solve every newly emerging problem.

The law is more than just a set of rules as you have probably realized. It helps maintain security and stability in society, and its stable structure assists our societies to reach their full potential. The law is the compass that has guided humans from the first law-abiding communities to where we are today. As it continues to lead us into the future, the law will hopefully help us develop societies that are not just more harmonious but also more civilized.

A Understanding the text

A1 Read the lecture transcript and complete the chart below with the main idea of each paragraph.

A2 Read the lecture transcript again carefully and answer the following questions.

1 How did the *Code of Ur-Nammu* present laws?

2 Why does the lecturer give the example of the abolition of slavery laws?

3 What are the two main legal systems?

4 What limitations does the law have?

A3 In pairs, discuss the following questions.

1 How do laws evolve? Use information from the lecture transcript or other sources to support your idea.

2 Can you think of any laws that are related to your daily life? Give some examples.

I'm convinced everyone strives to be a law-abiding citizen, but it's conceivable that you're breaking the law without realizing. Have you ever shared an e-book online without the author's permission or helped your friend in a situation with no idea that it was not legal? Such behaviour (1) _____ lawbreaking. Not knowing something is illegal is no excuse, and you will have to face the (2) _____.

Nevertheless, you (3) _____ avoid such mistakes by raising your awareness of the law. The key is to educate yourself. Libraries provide law books, and there are some websites where you can browse law journals and essays. You can also attend courses and lectures on law, offline or online. Besides, getting involved in (4) _____ activities or events organized by your school or community can teach you about its importance.

In addition to keeping abreast of the law, observing the law will ensure you behave like a (5) _____ citizen of high integrity. Under certain circumstances you may feel the impulse to do something against the law or react to a situation in a way that is unlawful. Know what a (6) _____ is and the penalty it carries. This could help you get a hold of your emotions and (7) _____ any conflict calmly and legally. Moreover, understanding the law means you can turn to it for protection when needed. What if someone hacked your social media account and (8) _____ this to contact your family or friends and ask for money? This would be when you turn to the police for help.

Overall, ensuring you are aware of the law will put you in good standing whether you're in school or stepping out into the world. Observing the law is the foundation of good citizenship, and we are all responsible for maintaining order in our society.

B2 The lecture transcript uses a metaphor to show the significance of the law to the progress of societies. Find the metaphor in the transcript and write your own metaphor to describe the importance of the law in society.

Dear Ms Ma,

I am the Student Union Chairperson of Xinghua High School. I am writing to ask whether you could attend the Law Day organized by our school. The Law Day will take place on Monday, 12 June, aiming to raise students' awareness about the law.

The Law Day will include speeches from guest speakers, workshops and role-plays of some famous legal cases. It is also expected that there will be Q&A sessions after each expert's speech. Officers from the Police Department and Professor Lin from the Law School of Xinghua University have been invited. It would be wonderful if you could give a speech sharing your professional wisdom at the event as a high-profile practising lawyer.

I look forward to your reply in due course. It is my sincere hope that you are able to accept our invitation.

Kind regards,

Chris Yu

Hi Tony!

How are you? I'm writing to let you know about the Law Day we're organizing. Have you heard about it? I know you're interested in studying law at university, so this will probably be really helpful!

There'll be workshops. Also, there'll be a number of talks about legal careers. Police officers and law experts, including Alice Ma, are all coming, hopefully! I've invited her to give a speech. Fingers crossed she'll say yes!

Anyway, I hope you can make it!

See you soon,

Chris

First Law Day is a success!

By Chris Yu

13 June

Our school successfully held the first ever Law Day on Monday, 12 June. ⁽¹⁾ Law experts and police officers came. The activities included speeches, workshops and role-plays. Each guest speaker hosted a Q&A session after their respective activity.

⁽²⁾ The guest speakers and their activities were a big hit! Alice Ma, a local leading lawyer, shared details about her career and how she reached the top of her profession. Many students felt very inspired by her speech. One student mentioned afterwards, "Ms Ma has opened my mind. I'll look into pursuing law as a career for sure!" Professor Lin from the city's well-known university kept students' attention with his interesting topics. He informed students about numerous aspects related to law, for example, its origins.

⁽³⁾ Representatives from the police held workshops and role-plays of some legal cases. They were involved in investigating these cases. The activities inspired the students to participate. One of the policemen stated, "I was delighted that the students showed an interest in the law."

Overall, the Law Day was a success. ⁽⁴⁾ How eager students were to take part in a variety of activities! We were pleased to see that. Students actively asked relevant questions, and the guest speakers shared as much of their knowledge as they could during the Q&A session.

The organizers were pleased with the success of the Law Day. One of the organizers said, "This was a wonderful opportunity for us all to learn about the law. Seeing the high number of interested students at this year's event, we are all fired up about next year's Law Day. I believe more speakers and interactive activities will be included."

B3 Role-play Chris Yu and write a short thank-you email to Alice Ma after the Law Day event using appropriate formal language.

Protecting intellectual property

A Tony is reading a leaflet about the basics of intellectual property. Read the leaflet below and fill in the following table.

Intellectual property

Intellectual property is at the core of technological innovation. In the information age, businesses and individuals are producing more digitalized creations than ever before. These can be accessed online from anywhere, making them easy targets for infringement. Hence, the protection of intellectual property has become even more important. Let's look at some information about intellectual property.

Q: What is intellectual property?

A: Intellectual property, or IP, is the product of someone's mind, for example, inventions, literary and artistic works or designs.

Q: Why should we protect intellectual property?

A: The main reason is to ensure IP creators' legal rights are safeguarded in areas such as securing their usage rights. Moreover, IP protection promotes an environment in which creative and innovative ideas can grow. Creators who are rightfully acknowledged and awarded for their time and effort have more motivation to innovate.

Q: What types of intellectual property are there?

A: There are four most common types protected by law: copyrights, patents, trademarks and trade secrets. Copyrights protect literary, artistic and scientific works. Copyrights cover works ranging from books to music to technical drawings. Patents grant inventors exclusive rights to their inventions. A patent is applied for on a product or a process that provides a new way of doing something or offers a new technical solution to a problem. Trademarks help distinguish the goods or services of one company from those of others. A trademark is a word, symbol or picture owned by a company. Trade secrets are confidential business information vital to a company's success. A trade secret can be a formula, process or device that makes a product distinctive. The above-mentioned IP types allow the creators to earn recognition and financial rewards. When their IP rights are infringed, the creators can take legal action.

- 2 When do we celebrate World Intellectual Property Day?
a On 26 April. b On 6 April. c On 25 April.
- 3 What is the aim of World Intellectual Property Day?
a To stress the value of IP.
b To promote IP applications.
c To make people better aware of IP.

D Write an article about intellectual property for the school newspaper. Use your ideas from part C and the information in parts A and B to help you. Check and improve your writing after you finish it.

Tip

Organizing the body part of the writing logically

The body part of your writing must be organized logically, so that your readers can easily follow your ideas. Keep these in mind:

- It is important to separate each main point and to address each one with supporting details.
- Be sure to show clear links between your main points.
- When you move onto your next point, use transitional structures.

Read the introduction to Sir Arthur Conan Doyle and his short story "The Red-Headed League". Then read the adapted excerpt from the short story.

The Red-Headed League

(Excerpt)

Sir Arthur Conan Doyle (1859–1930) was a Scottish writer, whose best-known fictional character is the private detective Sherlock Holmes. The detective has the habit of paying attention to the smallest and seemingly insignificant details, which inevitably leads to him solving many mysterious crimes. "The Red-Headed League", narrated by Holmes's friend, Dr Watson, tells the tale of a man with red hair who joins a club for red-headed men and thus unknowingly helps a crime take place.

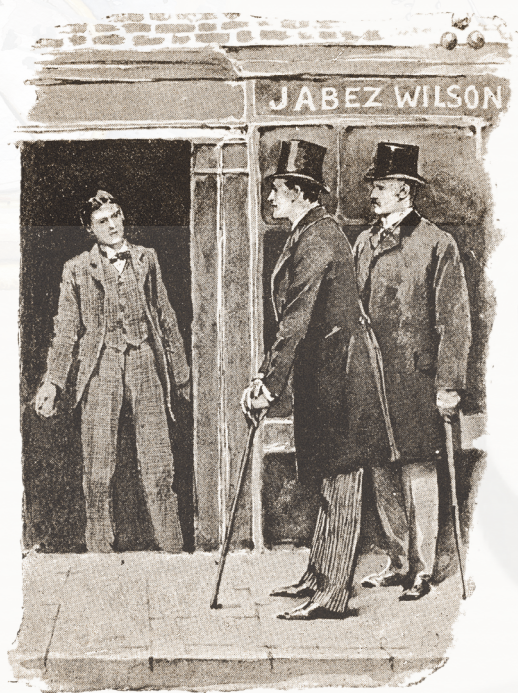

"You see, Watson," he explained in the early hours of the morning as we sat over a glass of whisky and soda in Baker Street, "it was perfectly obvious from the first that the only possible object of this rather fantastic business of the advertisement of the Red-Headed League, and the copying of the *Encyclopaedia*, must be to get Wilson, this not over-bright pawnbroker, out of the way for a number of hours every day. It was a curious way of managing it, but, really, it would be difficult to suggest a better way. The criminal Clay's clever plan was most certainly inspired by the colour of his accomplice's hair. The four pounds a week was used to attract him, and what was it to them, who were playing for thousands? They put in the advertisement; one criminal has the temporary office and the other one convinces the man to apply for it. Together they manage to secure his absence every morning in the week. From the time that I heard of the assistant having come for half wages, it was obvious to me that he had some strong motive for securing the situation."

"But how could you guess what the motive was?"

"The man's business was a small one, and there was nothing in his house which could account for such careful preparations and such expenses. It must, then, be something out of the house. What could it be? I thought of the assistant's fondness for photography, and his trick of vanishing into the cellar. Then I made inquiries as to this mysterious assistant and found that I had to deal with one of the coolest and most daring criminals in London. He was doing something in the cellar—something which took many hours a day for months on end. What could it be, once more? I could think of nothing except that he was digging a tunnel to some other building.

"So far I had got when we went to visit the scene of action. I surprised you by beating upon the pavement with my stick. I was establishing whether the cellar stretched out in

front or behind. It was not in front. Then I rang the bell, and, as I hoped, the assistant answered it. I hardly looked at his face. His knees were what I wished to see. You

35 must yourself have noticed how worn, wrinkled, and stained they were. They were evidence of those hours of digging. The only remaining point was what they were digging for. I walked round the corner, saw a bank connected to our friend's property, and felt that I had
40 solved my problem. When you drove home after the concert, I called upon Scotland Yard and the chairman of the bank directors, with the result that you have seen."

45 "And how could you tell that they would make their attempt tonight?" I asked.

"Well, when they closed their League offices, that was a sign that they cared no longer about Mr Wilson's presence—

50 in other words, that they had completed

their tunnel. But it was essential that they should use it soon, as it might be discovered, or the gold might be removed. Saturday would suit them better than any other day, as it would give them two days for their escape. For all these reasons I expected them to come tonight."

55 "You reasoned it out beautifully," I exclaimed in genuine admiration. "It is so long a chain, and yet every link rings true."

"It saved me from boredom," he answered, yawning. "I already feel it closing in upon me. My life is spent in one long effort to escape from the routines of daily life. These little problems help me to do so."

60 "And you are a benefactor of society," said I.

He shrugged his shoulders. "Well, perhaps, after all, it is of some little use," he remarked.

A Write a summary of how Sherlock Holmes solved the crime.

B What personality characteristics can you infer about Sherlock Holmes? Support your opinion using details in the short story.

C Dr Watson describes Holmes as "a benefactor of society". How do you understand his words?

Project

Making a leaflet about a legal case

A As a class, discuss what types of legal cases you are interested in. You can use the ideas below or think of other ideas. Then in groups, choose one case to research.

environmental pollution
property dispute

fraud
robbery

intellectual property theft
injury due to negligence

B As a group, research your chosen case. Use the ideas below to help you.

- What is the case outline? (When and where did the case happen? Who was involved in the case? What happened? ...)
- What is the case analysis?

C As a group, put together your information to make your leaflet. Use the example below to help you. Then present your leaflet to the rest of the class.

Danger hanging in the air

Case outline

On 11 March 2021, Mr Han threw construction waste from the third floor of the apartment he was repairing. The waste fell onto the ground in front of the apartment. The police investigated the case and discovered that the construction waste consisted of large pieces of wood with some iron nails, weighing about 250kg, which posed a serious safety hazard. Fortunately, no one was injured.

On 19 March, Mr Han was charged with the crime of throwing objects from a height. The judge sentenced him to 6 months in prison, 1 year's probation and a fine of 3,000 yuan. Mr Han pleaded guilty and accepted his punishment.

Case analysis

Just for convenience, the defendant Mr Han intentionally threw objects from the third floor many times. Large pieces of wood with iron nails fell onto the ground in a public space. Although his behaviour did not cause personal injury or property damage, the crime of endangering public safety by dangerous means should be applied. On 1 March 2021, throwing objects from heights was officially made a crime when the *Criminal Law of the People's Republic of China* was amended. Throwing objects from heights is a dangerous behaviour that must be reported to the authorities. By increasing public awareness of this crime, the danger hanging in the air can be avoided, keeping all citizens safe.
